MVTec external pilot | single-seed post-hoc examples
Paired evaluation n = 150; deterministic diagnostic selection

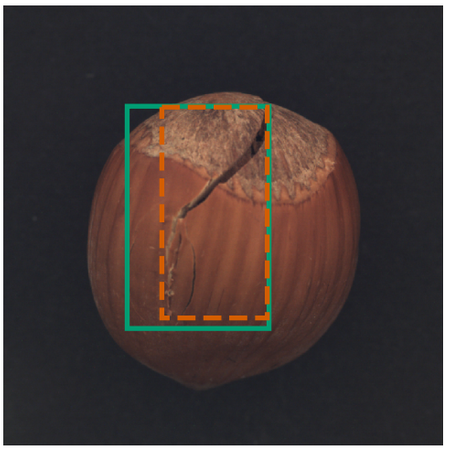

Ground-truth union box Predicted union box

Base | Label: anomalous | Pred: normal
Class: wrong | Union-box IoU: 0.000

Base wrong / SFT correct | hazelnut

Coverage SFT | Label: anomalous | Pred: anomalous
Class: correct | Union-box IoU: 0.705

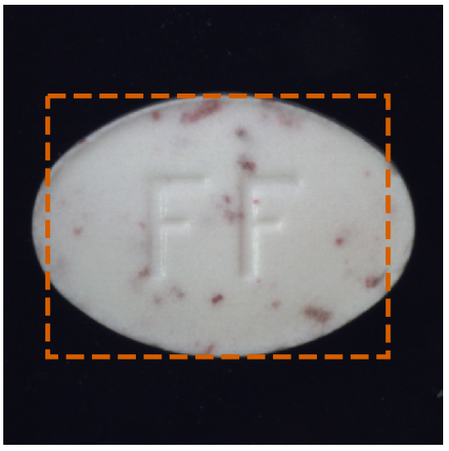

Base wrong / SFT correct | hazelnut

Base | Label: normal | Pred: normal
Class: correct | Union-box IoU: N/A

Base correct / SFT wrong | pill

Coverage SFT | Label: normal | Pred: anomalous
Class: wrong | Union-box IoU: N/A

Base correct / SFT wrong | pill

Base | Label: normal | Pred: anomalous
Class: wrong | Union-box IoU: N/A

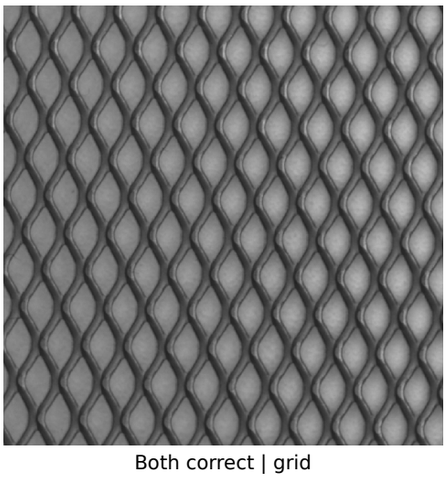

Both wrong | bottle

Coverage SFT | Label: normal | Pred: anomalous
Class: wrong | Union-box IoU: N/A

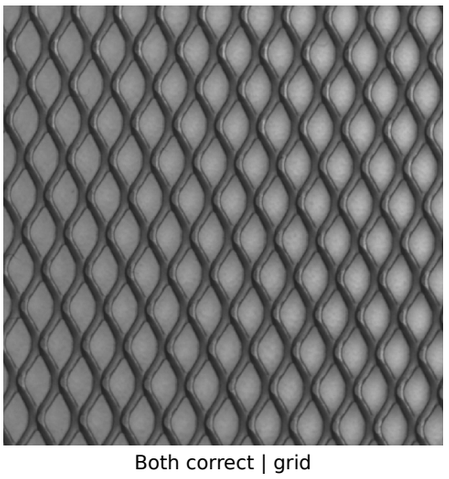

Both wrong | bottle

Base | Label: normal | Pred: normal
Class: correct | Union-box IoU: N/A

Both correct | grid

Coverage SFT | Label: normal | Pred: normal
Class: correct | Union-box IoU: N/A

Both correct | grid

Examples do not estimate aggregate performance. Identical full images in both columns.
Ground truth is overlaid after inference; no inference-time crop or label input.
